Tuesday, September 13. 1720.

Paris, September 13.

ON the 16th Instant an Arrêt was published, dated the Day before, which declares, That the King having caused to be examined in his Council the State of the Publick Credit, of the Foreign Exchange, of the Coyne of his Kingdom, and of the Price of Goods; his Majesty had judged it proper to make a general Regulation, with Respect to the Specie, the Bank-Notes, the Actions of the India Company, and the current Accompts in the Bank; and therefore ordains, That the Diminutions on the Coyne specified in the Arrêt of his Council of the 30th of July last, shall take place according to the Tenour of that Arrêt. That beginning from the Day of the Publication of the present Arrêt, and till the 1st of October next, the Bank-Notes of 1000 Livres and of 10000 Livres shall not be given in Payment either in the Offices of the Receipt of the Revenues or of the Farms, or between Private Persons, but with one half of the Sum in Specie; with an Exception however to Debts contracted before the 1st of August last, and to the Payment of the said Notes, or of the said Arrêt, and this till the 1st of October next exclusively, after which Day the said Notes shall not be current, nor be received but in the Manner, and within the Time specified in the said Arrêt. That beginning from the Publication of this Arrêt, the Bank-Notes of 100, of 50, and of 10 Livres, shall not be taken in the Receipts of his Majesty's Revenues and of his Farms, nor between Private Persons, on the Payment of a Sum of 20 Livres and upwards, unless with half the Sum in Specie; and for Sums under 20 Livres, Payment shall not be made otherwise than in Specie. That the Bank-Notes of 100, of 50, and of 10 Livres, shall be received without Specie, as well for the Payment of Debts contracted before the Publication of the present Arrêt, as for the Purchase of Annuities on the Aids and Gabelles, either Perpetual or for Lives, created by the Edicts of June and August last, or of the Annuities created on the general Receipt of the Revenue by another Edict of August last, and this to the 1st of November next exclusively, after which Term the said Notes of 100, of 50, and of 10 Livres, shall not be received alone and without Specie, but only for the Purchase of the said Annuities. That the current Accompts of the Bank shall be reduced to one Quarter-part of their former Value and Denomination: And that the Actions of the India Company (which were before fixed at 12000 Livres each,) shall with Reference and in Conformity to the said current Accompts in Bank be put upon the Foot of 2000 Livres each; so that whoever is concerned in the current Accompts in the Bank, may for every 2000 Livres purchase an Action of the said Company. This Arrêt, together with the second Diminution of the Coyne, which took place the same Day, has raised the Discount upon Bank Notes to 70 per Cent. On the 14th Instant, M. de Mesmes, First President of the Parliament of Paris, was sent for to the Palais Royal, on Ac-

count (as is given out) of the Establishment of a Chamber of Vacations at Pontoise, for the Dispatch of several Affairs which require a sudden Determination. We have Letters from Barcelona of the 26th of August, which advise, that the last Convoy with the Remains of the Spanish Troops from Sicily, was arrived there; that they consisted of 19 Battalions of Foot, 3 Regiments of Horse, and 2 of Dragoons, and that the Marquis de Lede was come with them. We have also Letters from Spain of the 3d Instant, advising, that Don Gonzalo Chacon, late Captain General of Sardinia, was arrived at Alicante, with the Spanish Forces which have evacuated that Island. On the 13th Instant, the King was present in his Chapel at the Celebration of High Mass, and in the Afternoon at the publick Prayers there, for imploring the Mercy of the Almighty on occasion of the publick Calamities: After which his Majesty went to the Elysian Fields in his fine Calash. The Bishop of Chalons, Brother to the Cardinal de Noailles, died two Days ago in his Diocese, very much lamented by all who oppose the Pope's Constitution *Unigenitus*, of which Party he was one of the great Supporters.

John Marshall, Maker of Optick Glasses to his Majesty.

At the Archimedes in Ludgate-street, London,

having by long Experience observed the abundance of People Sight is troubled by using false Spectacles, sold by Toy-men and other ignorant Persons. To prevent which, he doth searche Age on the Frame, for every one to know the Sight they wear, for it often happens, that a Person of 50 takes Spectacles of 60 or 70, to the hurting of their Sight, whereas if the Age had been known by the Buyer, he would not have used them. By the use of true Spectacles the Sight is much preserved, so that many Persons of 60 or 70 Years of Age, can on occasion read without them. Also Reading-Glasses and Spectacles of Rock Crystal, as well as Glass, Microscopes, Telescopes, and all other Optick Glasses, made to the exactest Perfection by him who is the only Person approved of by the Royal Society for the Art of Glass Grindings.
